# THE THRILL OF A PERFECTLY MATCHED DOWNSHIFT.

# 6MT designed for perfectionists

WORLD'S FIRST REV-MATCHING MANUAL TRANSMISSION In the past, smoothly downshifting required a delicate balancing act of matching the engine's rpm and letting out the clutch – fine for the racetrack, but difficult to execute on the street. With SynchroRev Match technology – included in the Sport Package – a seamless downshift is in the palm of your hand. By smoothing the transitions between shifts, the chassis stays more balanced, especially important when tackling an exhilarating corner – making this one transmission that's as much about handling as it is about power.

SYNCHROREV MATCH EXPLAINED This groundbreaking technology monitors the 6-speed manual's clutch pedal operation, shift lever movement and vehicle speed. As you shift to a lower gear, the system will "blip" the throttle to the ideal engine rpm for a supremely smooth downshift as you let out the clutch. The system also works when upshifting to give you a smooth flow of power when accelerating. If you want to marvel at modern technology, feel the difference for yourself by turning the system off with a switch mounted next to the shift lever.

# **7AT**designed for enthusiasts

#### EVERYTHING GREAT ABOUT A MANUAL - EXCEPT THE CLUTCH PEDAL.

Take the traffic-beating convenience of an automatic, factor in the power and flexibility of a manual, and you've got the all-new 370Z's 7-speed automatic transmission. 7 speeds give you a wide spread of gearing for heart-pounding acceleration, while still providing improved fuel efficiency and quiet, high-speed cruising. With a choice of driver-selectable modes, you can custom-tailor your driving experience like never before. And with Downshift Rev Matching, you've got the kind of ultra-quick, seamless downshifts that no manual transmission can match. Except of course, the 370Z's SynchroRev Match 6-speed manual.

DRIVER-SELECTABLE MODES Choose Automatic Mode for smooth, quick shifts. For momentary manual operation – for example to downshift to pass traffic – lightweight magnesium paddle shifters mounted on the steering column give you fingertip control. In Manual Mode, you get manual-style control with exceptionally quick shifts with a nudge of the shift lever or a pull of the paddle shifters. The transmission can even hold a gear in cornering for better balance, or downshift for more effective braking. And when a downshift is needed, Downshift Rev Matching automatically opens the throttle to match the rpm for smoother gear changes.

# A WICKED LITTLE G-FORCE-INDUCED GRIN.

Designed to conquer every corner – even the corners of your mouth. The all-new 370Z™ starts with a lower center of gravity and a shorter wheelbase for quicker response. Structural supports under the hood and along the body reinforce the chassis to handle the loads the suspension can dish out. Add in an enthusiast's wish list of high-performance componentry. And at every turn of the wheel, find pure joy as the 370Z™ turns handling science into pure performance art.

- 53:47 WEIGHT DISTRIBUTION For many, a static 50/50 balance is considered the perfect weight distribution for handling. But Nissan engineers realized that a 53 front/47 rear static ratio is actually ideal. Entering a corner, heavy braking sends the weight forward, improving traction of the front tires and adding steering control. At the precise moment the driver accelerates out of the apex, the weight distribution shifts rearward and becomes an approximate 50/50 balance. This translates into enhanced tire contact for better acceleration, improved directional stability, quicker turns and a handling feel that's uniquely Z°.
- VEHICLE DYNAMIC CONTROL A great sports car shouldn't just exhilarate, it should also inspire confidence. The 370Z's Vehicle Dynamic Control (VDC) continuously monitors the speed of each wheel, steering angle, yaw, lateral G-forces, and even braking pressure. It compares the data of the actual vehicle motion and, if it senses the onset of plowing (understeer) or fishtailing (oversteer), VDC brakes individual wheels and/or reduces engine power to help keep you on your steered course!

LIGHTWEIGHT SUSPENSION The lighter a suspension's components – called unsprung weight by engineers – the more quickly it can react to the driver and bumps in the road. Increased use of strong yet lightweight aluminum in the Z's front suspension makes it extremely responsive. Its 4-link rear suspension helps to keep the tires vertical to maximize contact patch, and allows the shocks to be separated from the springs, to reduce friction and improve performance. For even quicker response, the available 19" forged alloy wheels² are nearly 20% lighter than those on the previous Z.®

4-PISTON BRAKE CALIPERS ON 14" FRONT ROTORS Balance doesn't just apply to cornering – the more power you have, the better braking you need. To handle the most powerful Z° ever are the largest brakes ever offered on a Z° – available 14" front rotors with the gripping power of 4-piston front calipers². Purpose-designed ducting helps to reduce fade and provide predictable and precise stopping power.

1VDC cannot prevent accidents due to abrupt steering, carelessness, or dangerous driving techniques. Always drive safely. 2Included in the Sport Package.

# TECHNOLOGY THAT LOVES TO PLAY IN TRAFFIC.

BOSE° AUDIO SYSTEM Because even the most dedicated enthusiast might want to listen to something other than its spine-tingling dual-exhaust note, the 370Z™ features an available Bose° audio system that is custom-engineered for the unique shape of the Z's interior. And since it's also capable of playing MP3/WMA CDs, you can have the perfect soundtrack for any driving adventure.

iPod® INTEGRATION Plug your iPod® into the available interface system and you can control its functions through the audio system or touch-screen monitor, plus get playlist-style readouts on the digital display.<sup>3,4</sup>

MUSIC BOX™ With this available system, you can download up to 2,900 of your songs on its 9.3 GB hard drive and keep your CDs back at home. It also organizes your collection by mood, artist and song title for easy access and endless entertainment. For even more choices, the system offers the capability of playing MP3s from a CompactFlash® card.

> BLUETOOTH® Both hands on the wheel means no hands on the cell phone. The available Bluetooth® Hands-free Phone System has a voice-recognition feature that allows you to make and receive calls through the stereo speaker system.<sup>5</sup>

# NISSAN INTELLIGENT KEY™

with Push Button Ignition

TOUCH AND GO Never take your keys out of your pocket or briefcase again. Nissan Intelligent Key is so intuitive, it senses your approach to the car and allows you to unlock the door by just tapping a button on the handle. Once inside, start the engine without ever putting a key in the ignition.

HIGH-PERFORMANCE PROTECTION The Nissan Advanced Air Bag System includes dual-stage supplemental front air bags equipped with seat belt sensors and an occupant-classification sensor. These dual-stage air bags adjust their inflation rate, depending on the severity of impact and seat belt use. If the passenger seat is empty, a sensor actually deactivates that air bag. In addition, standard side-impact supplemental air bags are built into the seats, so they move with you as you adjust your seat. Standard roof-mounted curtain side-impact supplemental air bags help protect you and your passenger from above.¹

ACTIVE HEAD RESTRAINTS help reduce the chance of whiplash injuries by moving up and forward during certain rear-end collisions.

> SEAT BELT TECHNOLOGIES utilize pretensioners to help tighten the belt when front air bags deploy. And if your body puts too much force on the belt, load limiters give a bit.

From the moment you first think about a Nissan to the time you actually drive off the lot and long beyond, we want every experience to be special. Passionate. Exhilarating. Like the vehicles we design and build. After all, what's excitement without commitment?

When you're ready to buy or lease, Signature Financing offers financing options, attractive rates and flexible terms to make your decision easier and help make your purchase more accessible. Once you drive your Nissan home, it's protected with New Vehicle Limited Warranties, including a 3-year/36,000-mile "bumper to bumper" basic coverage and a 5-year/60,000-mile powertrain coverage. Want additional peace of mind? Consider Security+Plus, our extended service contract. A variety of plans lets you tailor the coverage to your driving habits. Maintenance+Plus, on the other hand, ensures your vehicle will receive up to 17 different services and over 33 different inspection tems at each visit, using the most up-to-date diagnostic equipment available. Finally, demand Genuine Nissan Parts. When it comes time for service, any necessary replacement parts will be made using Genuine Nissan new or remanufactured parts, or Nissan-approved parts. And they're the only parts to carry Nissan's factory-backed limited warranty.

Nissan's philosophy toward the environment, "Seeking a symbiosis of people, vehicles and nature", describes our ideal for a sustainable mobile society, now and in the future. We launched the Nissan Green Program with specific objectives to realize this goal, and we are pursuing it energetically. For more information, log on to NissanUSA.com/green
